 J_H deletion blocks cell surface IgM expression

Figure 3

Staining of peripheral blood lymphocytes with fluorescent anti-a allotype (A, D), anti-b allotype (B, E) or anti-B220 (C, F). (A, B, C) JH-deletion homozygous mutant mouse 244-3-2/F2-7, (D) A allotype control mouse, (E) B allotype control mouse. The number in each panel indicates the percentage of cells stained with the specific antibody.
